

# California OES Weather Threat Briefing

Friday, December 3, 2021  
9:00 AM PST

**Day 1 (Friday):** High astronomical tides could cause minor coastal flooding along the coastline Friday through the weekend.

National Weather Service  
Western Region Headquarters  
Regional Operations Center  
Salt Lake City, UT

# **WEATHER KEY POINTS**

**12/03/21 - 12/09/21**

## **Friday-Thursday**

- Areas of overnight and morning dense fog will continue near the southern California coast and across parts of the Central Valley and deeper northern California mountain valleys through the weekend
- High astronomical tides Friday through the weekend could cause minor coastal flooding in the Humboldt Bay area, across portions of the Bay Area, and at flood prone beaches across southern California such as Cardiff State Beach and Imperial Beach.
- Another round of gusty Santa Ana winds is expected Sunday, with elevated to locally critical fire weather concerns.
- A period of rainfall and high mountain snow is expected across primarily northern California on Monday
  - Precipitation is generally expected to be light to locally moderate, and there are no significant flooding concerns at the moment
- Additional precipitation is possible across the state for mid-to-late next week

# CALIFORNIA WEATHER IMPACTS
